Subject:

score over length search 10/016,149

Hi Paul,

I need a score over length nucleotide sequence search against nucleobases 703 to 992 of SEQ ID NO:3 in the above entitled case. I need the lower and upper limits to be 8 and 50, respectively, I need any hits that are above 65% complementarity, and please transfer as many hits into the excel program as possible. If possible, please search the interference databases as well.

Thanks,

Doug Schultz
